23.0K

Total Orders **In Full**
-27.8% v.s. Target: 76.5%

55.3%

All 3 KPI:

- On Time (OT),
- In Full (IF), and
- On Time In Full (OTIF)

are far below Target levels.

The trend shows that in general not even a single day the metrics can reach their target.

OTIF is remarkably low, not even half of the target.
=> Insufficient delivery services.

city: All Month: All Category: All

Customer	OT%	IF%	OTIF%

Vela Mart	73.7%	63.3%	43.3%

Total numbers of Orders are almost the same in Milan and Rome, while in Venice it is a bit lower.

The order amount of each product category is almost the same in each city:

- Dairy: ~ 11K
- Food: ~3.5K
- Beverages: ~3.5K

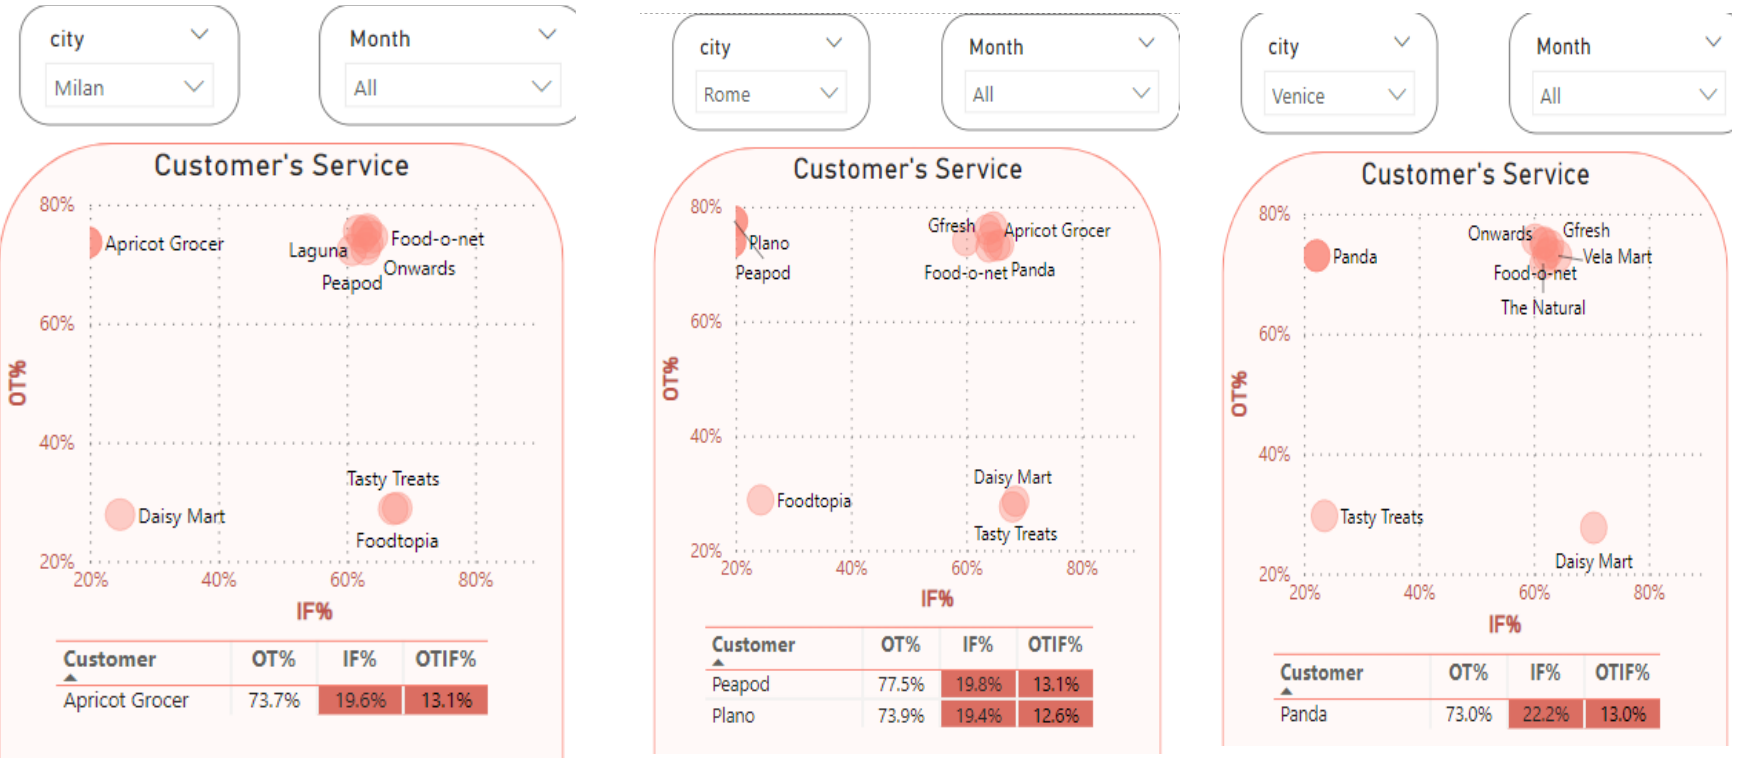

Dairy is the main product category with biggest order amount, around 1.5x higher than total order amount of Food and Beverages.

The first 6 Customers (Daisy Mart, Tasty Treats, Peapod, Food-o-net, Super Foods, and Foodtopia) accumulate for 52% of Total Orders => key customers

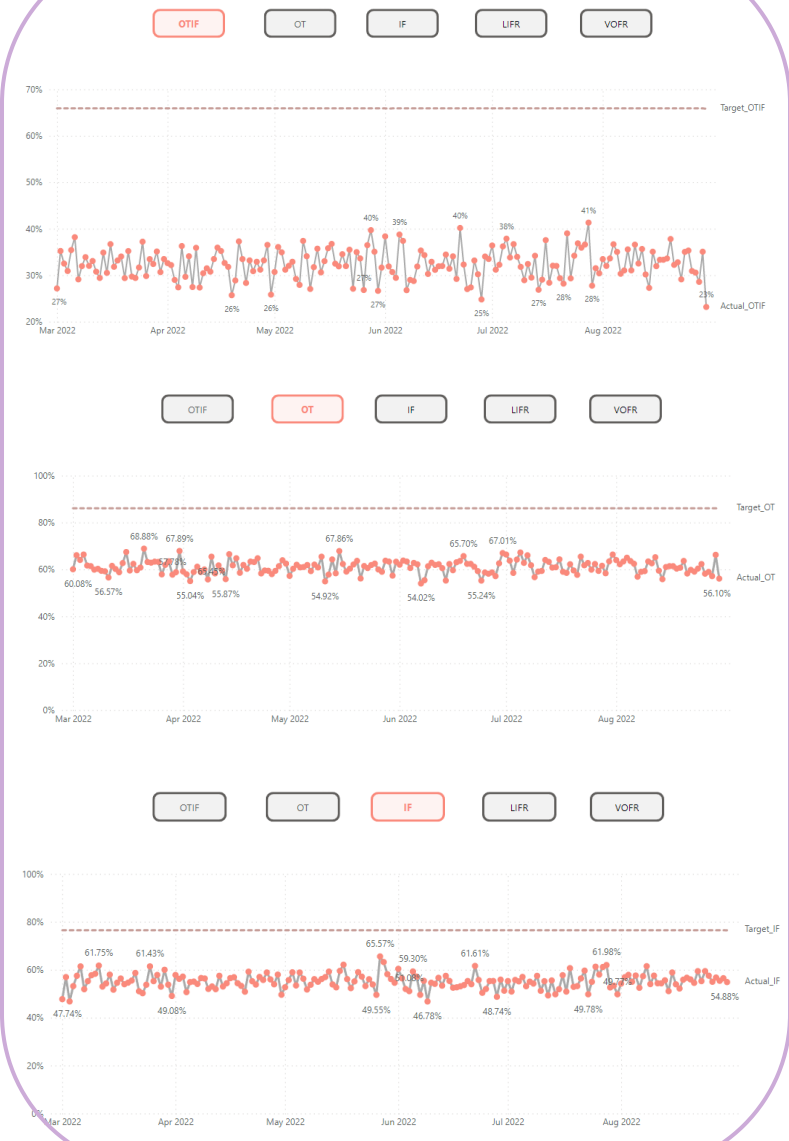

3 Customers: Daisy Mart, Foodtopia, and Tasty Treats have alarming low OT% and OTIF%, and their IF% are not great either.

When filtering the city:

- Milan: miserable service level for Apricot Grocer.
 - Rome: Peapod and Plano needs to be taken care of due to the poor IF% and OTIF%
 - Venice: disappointing IF% and OTIF% in Panda.
- => Poor performance on IF suggests that out of stocks happens quite often.
=> Inventory replenishment planning should be improved.

5

Several customers have lower Line Fill Rate than average, namely Apricot Grocer, Daisy Mart, Foodtopia, Panda, Peapod, Plano, and Tasty Treats. For Daisy Mart, Foodtopia, and Tasty Treats, more than 73% of their order lines are delivered later than required, and out of that 73% late shipment, around 60% of the times are delayed by more than 1 day.

=> If delivery capability is not improved, there are high chances that three key customers, namely Daisy Mart, Foodtopia, and Tasty Treats, are not likely to renew the contract.
